## Our Top Priorities

- Making you aware of insurance employment opportunities
- Providing you with the tools you need to be successful in your insurance career

# TURN-KEY RENOVATIONS

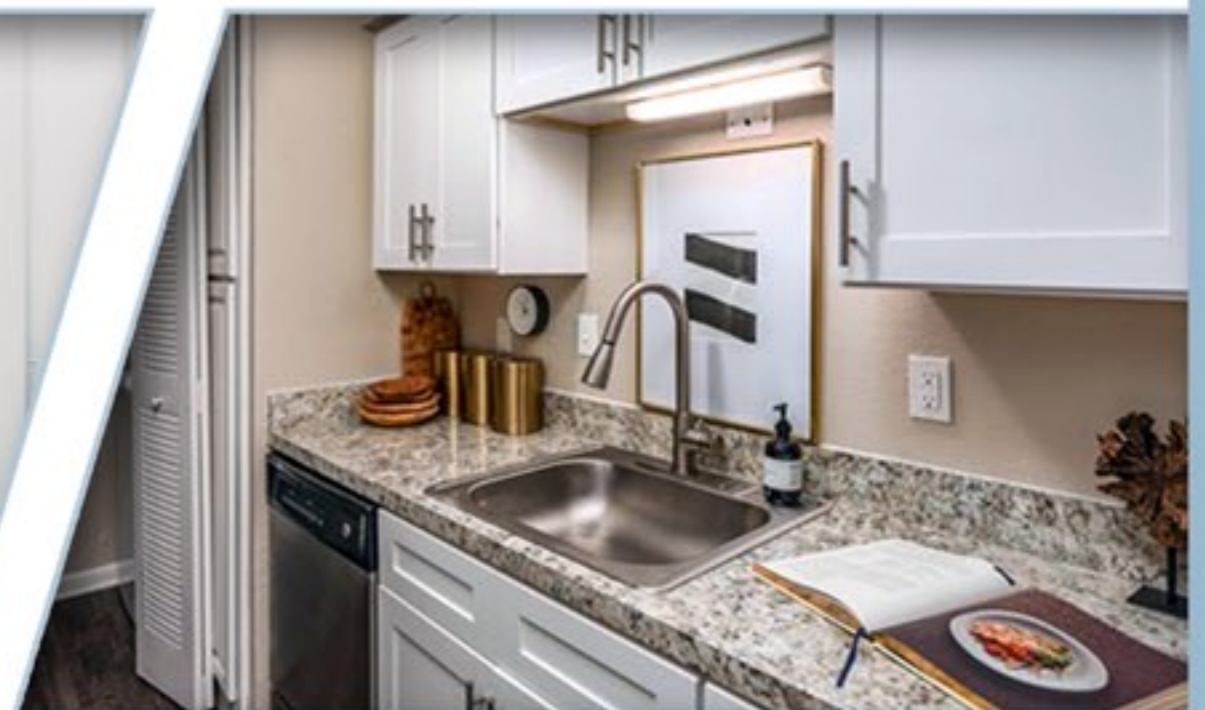

- *Design Expertise*
- *Quality Craftsmanship*
- *Experienced Professionals*
- *Quick Turn-Around*
- *Peace of Mind*

We are pleased to provide a turn-key system to streamline your interior renovation. Our superior system includes cabinets, plumbing and electrical trim, painting, flooring, appliances, hardware and cleaning in just five days. We deliver a quality finished product that will maximize your rental revenue and your peace of mind.

**20,000**  
Interior Unit Renovations  
Completed on time  
and on budget

**60+ Years**  
**OF**  
Intelligent  
Multi-family  
Solutions

*Think Construction Services* has extensive experience in completing multi-family and commercial interior renovations that excel in quality and functionality. If you are a property owner looking to give your apartment community or condos a facelift, we offer complete interior remodels.

Because we have licensed and trained tradesmen, quality contractors and well-seasoned project managers on staff, every job we perform is handled in-house, allowing us to pay close attention to every aspect of your project. This also ensures that your interior renovation project will be executed in a timely manner with quality craftsmanship and superior customer service.

**PROUD MEMBER OF THE FOLLOWING ASSOCIATIONS:**

# COMMERCIAL REPIPE

## We Are Repipe Professionals

Think Construction Services has established itself as the leader in multi-family repiping. Few can match the experience and expertise gained through successful repiping of over 100,000 occupied units in the last decade alone. Your property and residents are too valuable to trust with just any contractor. Take comfort with our experienced team of repipe professionals.

## WHY REPIPE?

### Prevent Leaks

Leaks are expensive disruptions to everyday life for residents and property staff. Eliminate a ticking time bomb of problems on your property.

### Prevent Mold

A variety of fungi can grow in a warm moist environment. Reduce and prevent mold growth by having a secure domestic water system throughout your property.

### Increase Property Value

Properties with leak history and older rusty piping sell for much less than you would like. Be sure to get the most out of your property when you sell by securing your investment with a new domestic water system.

### Keep Occupancy High

A property with a consistent leak pattern adds unwanted disruption and stress to residents and your property staff. Give peace of mind to your occupants by investing in a new domestic water system.

### Reduce Water Consumption

Underground or concealed piping can leak for years undetected. Eventually these leaks could be costing you (or your property) thousands of dollars each year.

### Provide Clean, Clear Water

Old rusty piping can often cause discoloration in the water. Put your residents' fears to rest with a new domestic water system that will give them clean, clear water.

### Improve Water Pressure

Water leaking from water pipes, restricted flow from rust, or improperly sized piping can result in poor water pressure. Reduced water pressure will increase the chances of residents being scalded during multiple fixture use especially during peak usage periods.

## REPIPE PACKAGE OPTIONS
